Clearlane

MIGRATION · DATA CENTER TO CLOUD

What replaces your clients' Data Center add-ons, macros and scripts

Data Center: no new customer licences since 30 March 2026; existing customers can buy, apps included, until 30 March 2028; read-only from 28 March 2029. Every migration is a moment when your client needs Cloud replacements for what was built or bought on Data Center. This page maps the usual needs to the Clearlane app that covers them in the Cloud.

ON DATA CENTER, YOUR CLIENT USED…	IN THE CLOUD: CLEARLANE APP	WHAT IT DOES
CONFLUENCE		
"Read and confirm" macros or read-tracking add-ons for procedures and policies	**Read & Understood**	Read confirmations bound to each page version, with questions.
Document approval workflows, review dates and controlled copies	**Controlled Documents**	Approvals with e-signatures, read confirmations and an audit trail.
Questions-and-answers spaces	**Answers**	Questions and answers kept as ordinary Confluence pages.
Page-review reminders and scripts that flag outdated pages	**Fresh**	Which pages are out of date, and one click to confirm the rest.
JIRA: QUALITY AND COMPLIANCE		
Test-management add-ons, or "Test" issue types with results in comments	**Tests**	Test cases, test runs and requirements coverage in Jira.
Hand-built CAPA or nonconformity workflows	**CAPA**	Corrective actions on any Jira work item, closed with proof.
Risk registers in custom issue types or spreadsheets	**Risk Register** in Atlassian review	A risk register per project: 5 × 5 map, actions, signed reviews.
Vulnerability tickets with deadlines tracked by scripts or spreadsheets	**CRA**	Cyber Resilience Act deadlines, ENISA fields and SBOMs in Jira.
Incident tickets whose notification deadlines are tracked elsewhere	**Breach & Incident Reporting** in Atlassian review	GDPR breach and NIS2 / DORA incident notifications in Jira.
JIRA: PLANNING AND REPORTING		
Gantt or timeline add-ons	**Gantt**	A timeline you plan by dragging, with dependencies and clashes.
Several reporting add-ons: Gantt, time in status, forecasts, budgets	**Delivery** in Atlassian review	Gantt, time in status, forecasts, budgets and reports in one app.
Cost reports built from worklogs	**Budget**	Spend, margin and final cost of a project, from Jira worklogs.
"When will it be done?" spreadsheets	**Forecast**	Delivery dates from your team's real pace, with the odds.
Scripts or filters that flag stuck work	**Pulse**	Work in progress that has run longer than usual.
Custom agile dashboard gadgets	**7 dashboard gadgets**	Sprint Burndown, Velocity, Created vs Resolved, Throughput, Cumulative Flow; WIP Aging and Cycle Time in Atlassian review.

- Data: Clearlane apps start fresh in the Cloud; there is no Data Center data import, except Tests, which imports test cases from CSV.
- Every app is built on Atlassian Forge and runs entirely on Atlassian: data stays in the client's Atlassian site.
- Free trial on the Atlassian Marketplace. Interfaces in English, French and German.

For partners: Atlassian partner discount plus a Clearlane commission on every client you bring. Partner kit, rate and terms: maxime@clearlaneapps.com · clearlaneapps.com/partners
